

“The future of managing risk across multiple organizations will require data to drive analytics, benchmarking of all participants and custom mitigation programs designed to reduce each participant’s risk profile. The Internet, combined with new tools like those delivered in PreventionLink, offers us an exciting solution to reach all our members and their employees in our ongoing effort to reduce claims and mitigate risks.”

Greg Hall
ARM, Chief Executive Officer
SDRMA

Introducing PreventionLink™

Special Districts Risk Management Authority (SDRMA) has partnered with TargetSafety to deliver a comprehensive enterprise risk management platform to all SDRMA members. This web-based platform, known as PreventionLink, is an exceptional utility program that offers users efficient, time-saving, risk management tools.

Used by more than 2,500 public entities nationwide, PreventionLink features:

- An extensive library of online courses delivered as part of a comprehensive and user-friendly training management system
- Flexible tools to monitor key compliance tasks, distribute organizational policies and manage employee certifications and licenses
- Easy-to-use communication solutions for exchanging information and data across your organization
- Powerful risk identification and mitigation technologies to help analyze your level of risk
- An automated system to monitor employee driving records

PreventionLink™

Powerful web-based enterprise risk management software

Whether you are training and communicating with your employees, or working to ensure compliance and a reduction in your overall risk, PreventionLink helps streamline and automate the process. It is built on an exceptional technology platform that includes powerful analytics, along with a wide range of solutions to meet your specific needs.

Training Management

PreventionLink's Training Management module provides employees with 24/7 access to self-paced training. Our library of online courses is proven to create a safety-focused culture as well as substantially reduce claims and lost work days. This easy-to-use training management system schedules, manages and documents all training.

Compliance Management

The Compliance Management module arms your organization with tools to create and oversee key compliance tasks, manage and distribute organizational policies, and track the status of user certifications. The module assigns, monitors and documents all mandatory and mission-critical activities to help ensure that state and federal laws—and your organization's own policies—are followed.

Communication Management

The Communication Management module is a powerful system that enables an interactive exchange of information and data across all of the organization's stakeholders. It makes it easy for employees to communicate their feedback on operations and processes.

Risk Management

The Risk Management module allows your organization to define, measure and monitor the key risk metrics that help keep employees safe and protect assets. The module includes comprehensive risk identification and mitigation tools, making it possible for you to analyze the general fundamentals of your organization and take action where it is most needed.

Analytics

The Analytics module features instant visibility to a broad range of risk drivers across your organization. Administrators can identify key metrics, run reports, benchmark operating units, and implement corrective actions. A powerful reporting engine generates real-time reports on training records and the status of compliance tasks. The module also includes a dashboard and other reporting systems.

Technology Platform

PreventionLink's robust technology platform powers the system's four modules. It also automates the documentation of training and compliance activities. Delinquent activities are instantly flagged, providing visibility to key metrics and ensuring accountability across the organization.

Benefits for SDRMA Members

Available to SDRMA members at no extra charge, PreventionLink provides you and your employees with access to a powerful, online risk management platform—one that can significantly reduce your organization's claims and losses. This platform features a customized URL and branding that matches your website. It also includes all the tools you need to:

Cost-Effectively Train Your Employees

SDRMA members have access to more than 200 hours of targeted, self-paced, web-based training—designed to change unsafe and unacceptable employee behaviors. This training is available 24 hours a day, seven days a week. In addition, PreventionLink enables you to design custom training courses as well as schedule, administer and document training.

Earn Credit Incentive Program Points

SDRMA members can earn up to 9 CIP points for completing online training courses through PreventionLink.

Streamline Communication across Your Organization

PreventionLink's File Center lets you upload files and important website links, giving you the ability to disseminate organizational policies to every employee. In addition, the platform enables you to distribute and monitor critical tasks.

Simplify Recordkeeping and Ensure Compliance

PreventionLink's Custom Activities make it possible for you to create, assign and track the completion of all instructor-led and organizational training, deliver and manage employee acknowledgement of your group's policies as well as document inspections and other compliance-related activities.

Improve Management Decision Making

PreventionLink's detailed reporting and analytical tools help arm managers and supervisors with the information required to make timely decisions—helping your organization identify risk early, before a claim is ever filed.

Available Training Topics:

- Employment Practices for Managers and Supervisors
(includes courses for AB1825 & AB1234)
- Environmental Health and Safety
- Employee Wellness and Workplace Safety
- Driving Safety
- Firefighter and Fire Officer
- EMS Continuing Education
- Water and Wastewater Continuing Education

“We wanted a program that was cutting edge and efficient but, at the same time, very comprehensive. I think we have found that with PreventionLink.”

Evelyn Barfield
Safety Officer
San Joaquin Valley APCD

Services: *Unparalleled, Exceptional Customer Care*

TargetSafety is dedicated to providing world-class customer service. This service begins the day we first contact you and continues as part of:

Implementation

Our experienced implementation team will work alongside you to ensure that the PreventionLink platform is configured properly to support your organization's needs. And, we'll provide the training necessary to get you up and running once the implementation is complete.

Customization

Our talented team of developers and programmers will create a customized solution for you that looks and feels like a seamless extension of your organization. We can tailor this solution to include your website branding and specific policies and procedures in our training courses. We can also assist you by implementing customized reporting options, providing video hosting and integrating with third-party vendors.

Help Desk Support

Our Help Desk is available 24/7 and will continually make sure that you and your organization are utilizing the full power of PreventionLink.

Account Management

As your main point of contact, our seasoned account managers will oversee your PreventionLink experience, ensuring that our products and services exceed your expectations and provide you with the highest return on investment.
