

June is National Safety Month

During National Safety Month, we encourage you to learn more about important safety issues like preventing poisoning, slips, trips and falls, and improving transportation safety.

Poisonings

9 out of 10 poisonings happen right at home. You can be poisoned by many things, like cleaning products or another person's medicine.

Slips, Trips and Falls

1 in 4 older adults falls each year. Many falls lead to broken bones or a head injury.

Transportation Safety

Doing other activities while driving – like texting or eating – distracts you and increases your chance of crashing. Almost **1 in 6** crashes (15%) where someone is injured involves distracted driving.
